

Science – Living Things and Their Habitat

What I might already know: Names of a variety of common animals including fish, amphibians, reptiles, birds and mammals. Able to identify and name a variety of common animals that are carnivores, herbivores and omnivores.

KEY QUESTIONS:

What is a habitat?

What we will be learning:

Which conditions do different animals prefer to live in?

HABITATS

A **habitat** is the natural place in which something lives and gets everything it needs to **survive**.

Forest

Pond

Arctic

Coast

Ocean

Micro

What are herbivores, carnivores and omnivores?

Herbivores eat plants
Carnivores eat meat.
Omnivores eat both plants and meat.

Can we group things to show which are living, dead or have never been alive?

alive

used to be alive

never been alive

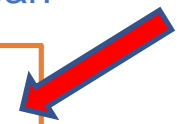

Under a log

Under a leaf

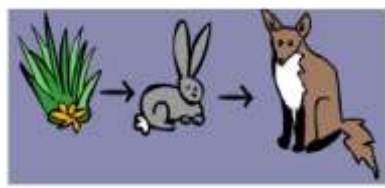

In a bush

Around a pond

Micro habitat

Food chain
A food chain is a diagram that shows us how animals are linked by what they eat.

The grass is eaten by the rabbit.
The rabbit is eaten by the fox.
