

Geography: What is my local area and region like and how has it changed overtime?

What I might already know: continents and main cities within the UK

What we will be learning:

Can you identify physical features

Can you identify human features?

What has changed in the local area?

Why do maps have different scales

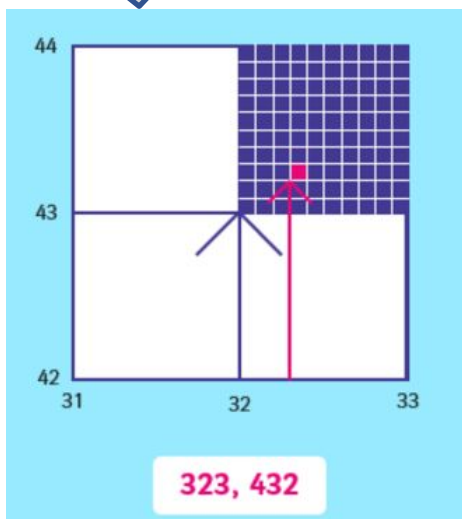

Vocabulary: *continent, country, city, region, immediate local area, human features, bodies of water, boundaries, shapes and colours, landmarks, landscape, ordnance survey maps, scale*

How does my local area fit in with other places, near and far?

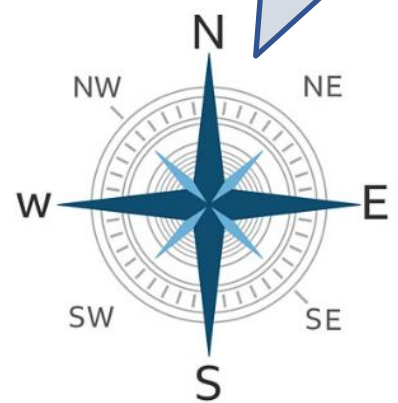

Can you locate England and Europe on a World map?

Can you create six-figure grid references?

Can you use compass points to identify the approximate location of a place?

Can you locate the nine regions of England?

Can you locate Cornwall?
