

Chacewater School - LEAP Into Learning - Autumn 2 Buds

HISTORY - Who invented the first flying plane?

KEY QUESTIONS:

Key Knowledge:

Who are the Wright brothers?

Wilbur and Orville Wright were brothers and American **inventors** who are now known as **pioneers of aviation**.

How has flight changed since the Wright brothers?

The Wright brothers invented and built the world's first ever successful heavier than air aeroplane in 1903.

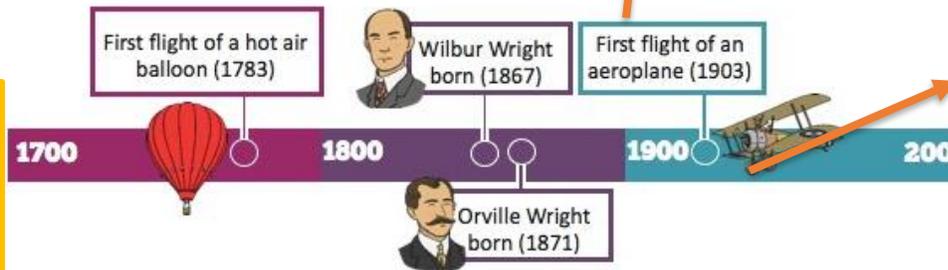

Who was Amelia Earhart?

Amelia Earhart was an **aviator** and the **first woman** to fly **solo** nonstop across the Atlantic ocean. She disappeared in 1937 over the Pacific ocean.

They changed the design of early planes and introduced new parts, like jet engines. These new engines made it possible for airplanes to fly higher and at much faster speeds than ever before.

The first flying plane happened **beyond living memory**. Which means it happened before we can remember.
